

event

```
graph BT; router_discovery_event --> event
```

A diagram illustrating a relationship between two classes. A box labeled 'event' is at the top, and a box labeled 'router_discovery_event' is at the bottom. A vertical arrow points from the top of the 'router_discovery_event' box to the bottom of the 'event' box, indicating that 'router_discovery_event' inherits from or is a specialization of 'event'.
